SUMMARY

Full-stack software engineer with 4+ years of experience building and maintaining production web applications. Specializes in Vue and Node.js ecosystems, with a focus on developing scalable features, improving user workflows, and owning applications end-to-end.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, HTML, CSS, SQL

Frontend: Vue, React, Svelte, Tailwind CSS, Bootstrap

Backend: Node.js, Fastify, Express

Databases/ORMs: PostgreSQL, MongoDB, Prisma, Sequelize, Mongoose

Tools: Git, GitHub, REST APIs, GraphQL

EXPERIENCE

Digital Glue

Software Engineer (January 2026 - Present)

Junior Software Engineer (March 2023 – January 2026)

Intern (February 2022 – March 2023)

- Led integration of Archiware APIs into the platform, building full-stack functionality to support file restore workflows and media management.
- Developed and maintained features for a cross-platform desktop application, including file browsing, storage mounting, metadata viewing, and file transfer functionality.
- Currently serve as the sole developer and maintainer of the desktop application, owning ongoing feature development, bug fixes, and stability.
- Act as the sole frontend developer for the web application, responsible for building and maintaining user-facing features.
- Collaborate with product managers and backend engineers to scope and deliver features across the stack.

EDUCATION

Certificate, Full Stack Web Development

University of Pennsylvania — September 2021 - November 2021
